Company-wide Agility with Beyond Budgeting, Open Space & Sociocracy

Survive & Thrive on Disruption

The diagram shows the word "BOSSA nova" in a stylized font. Four arrows point towards it from the words "Beyond Budgeting", "Sociocracy", "Open Space", and "Agile". A large arrow points to the right from the end of "BOSSA nova".

Jutta Eckstein John Buck

# Agenda

- **Welcome & Set the Stage**
- **Definition of Sustainability**
- **Sustainability & ICT**
- **Agile Manifesto & Sustainability**
- **Debrief**
- **Wrap-Up & Feedback**

# Purpose of this Session

- **Understand:**
  - Agility comes with a responsibility
- **Goal:**
  - Increase the awareness!

# Definition of Sustainability

Sustainable development  
is development that meets  
the needs of the present  
without compromising  
the ability of future  
generations  
to meet their own  
needs

UN Brundtland commission

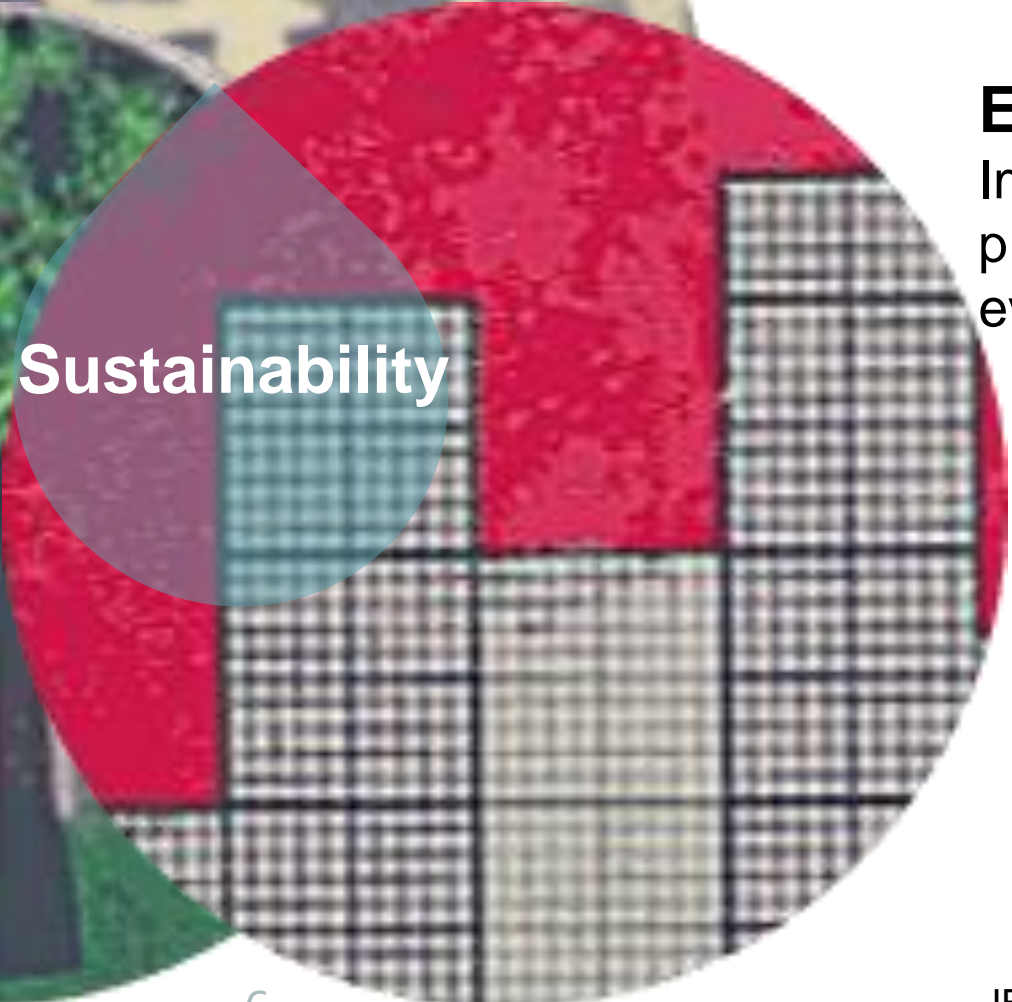

**Social/People**

Aiming on Ending Poverty

**Economic/Profit**

Improving the lives & prospects of everyone, everywhere

**Environment/Planet**

Protecting the Planet

Sustainability

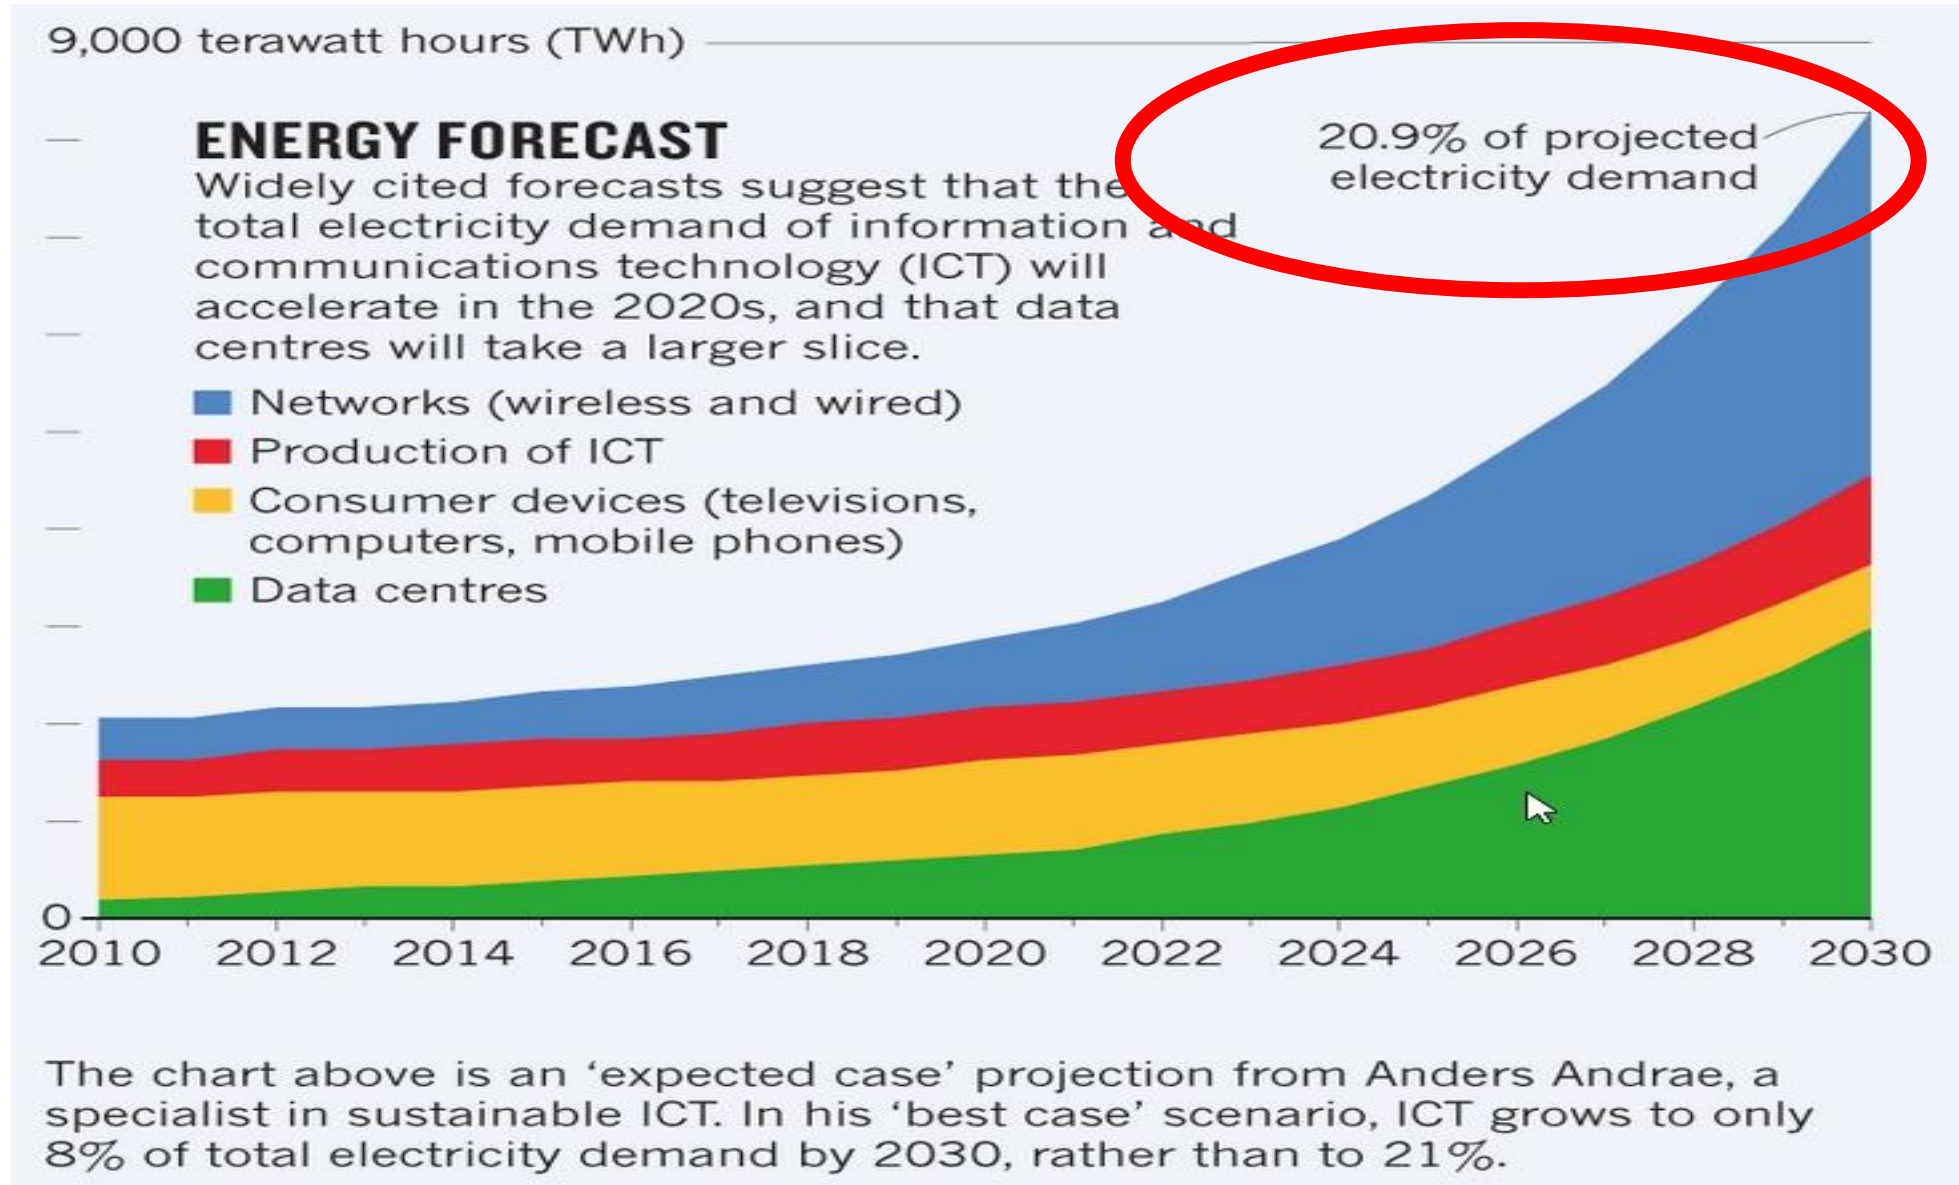

# Sustainability & ICT

# Impact on Sustainability by ICT

# Impact on Sustainability in ICT

# Impact on Sustainability in ICT

In 2019, **53.6** million metric tonnes of electronic waste was generated worldwide (that's plus 21% in 5 years.)

This is an equivalent of almost **5,400** Eiffel towers.

# Agile Manifesto & Sustainability

# Agile made a Promise!

Individuals and interactions over processes and tools  
Working software over comprehensive documentation  
Customer collaboration over contract negotiation  
Responding to change over following a plan

**Self-organization**  
**Transparency**  
**Constant Customer Focus**  
**Continuous Learning**

## **Transparency**

Make the company's actions transparent both internally and externally.

## **Self-organization**

Regard the company as one node of a global network that creates the environment it lives in together with other companies and societal institutions.

## **Continuous Learning**

Learn continuously from and with society to make the whole world a better place.

## **Constant Customer Focus**

Understand the economic, ecologic, societal, and social environment as a customer that needs permanent attention.

## Agile Principle 8:

**Agile processes promote sustainable development. The sponsors, developers, and users should be able to maintain a constant pace indefinitely.**

Take sustainability holistically into account. E.g., developing the product or service should not lead to burnout of the developers (social), to the reduction of resources (environment), or to overspending financially (economic).

- Does the documentation inform about its resource-efficient use and is the information easy to understand?

- What might extreme use or unhealthy engagement look like with our product?

- Can we guarantee that the current release can be executed on a reference system that is n years old?

Read & discuss the background & questions, note what comes to your mind:

- Comments or questions & examples
- Actions you can tackle in your workplace
